SUMMARY

A consistent Dean's Lister pursuing a Bachelor of Science in Computer Science, Mr. Chavo is an aspiring full-stack developer with a multidisciplinary background in creative direction. He has demonstrated success in deploying real-world software solutions to modernize institutional workflows and improve administrative accessibility. Known for resourcefulness and sharp attention to detail, he focuses on building impactful and scalable applications grounded in practical logic. He carefully navigates realistic constraints to ensure every solution is delivered efficiently without sacrificing quality.

EDUCATION

University of Science and Technology of Southern Philippines <i>Bachelor of Science in Computer Science</i>	Cagayan de Oro 2023 – Present
Liceo de Cagayan University <i>Science, Technology, Engineering, and Mathematics Strand</i>	Cagayan de Oro 2021 – 2023

EXPERIENCE

Project Manager & Frontend Developer <i>Office of the University Registrar - USTP CDO</i>	Active Project Cagayan de Oro
- Served as project manager for system development initiatives while contributing as a frontend developer to modernize university document processing. - Led the development of "iREQUEST: Online Credential Request System," collaborating on its frontend implementation. - Managed and successfully deployed "LocatR: Student Record Locator System" to improve administrative accessibility.	
Graphic Designer and Video Editor (Freelance) <i>Independent</i>	2021 – Present
Accepts commissioned projects and freelance work for diverse requirements, managing visual branding and various creative works.	

PROJECTS

LocatR: Student Record Locator System <i>Python, CustomTkinter, SQLite, TeX</i>	2025
Desktop application designed to transition the university registrar from manual to digital record keeping.	
iREQUEST: Online Credential Request System <i>JavaScript, React, Vite, Tailwind CSS, Python, Django</i>	2025
Developed a web-based platform to assist the USTP CDO Registrar in processing document requests.	
AListō: To-Do List App <i>TypeScript, Tailwind CSS, PostgreSQL</i>	2024
A modern and intuitive to-do list web application designed for efficient task organization.	
Gift Exchange App <i>JavaScript, React, Tailwind CSS</i>	2024
Platform developed to automate holiday gift exchanges and overcome distance constraints.	

CERTIFICATIONS

SQL (Basic) <i>HackerRank</i>	2026
Certificate of Deployment (System Development) <i>Office of the University Registrar, USTP - CDO</i>	2026
Programming for Intermediate Users Using Python <i>Department of Information and Communications Technology - Region X</i>	2024

TECHNICAL SKILLS

Frontend Development: React, TypeScript, JavaScript, Tailwind CSS, Vite, HTML5, CSS3
Backend & Database: Python, Django, PostgreSQL, Supabase, SQLite
Multimedia & Design: Figma, Canva, Photoshop, Premiere Pro, DaVinci Resolve, CapCut
Tools & Utilities: Git, GitHub, Vercel, Tkinter, CustomTkinter, LaTeX, Framer Motion, GSAP
Soft Skills: Document and Research Writing, Project Management, Strategic Planning, Attention to Detail, Time Management, Effective Communication
